Terms of Use

MyCryptoLog · 07/11/2026

ARTICLE 1: Purpose

These “terms of use” set out the legal framework under which the services of the MyCryptoLog application are made available and used by “the User”.

The terms of use must be accepted by any User wishing to access the application. They form the contract between the MyCryptoLog application and the User. Access to the application by the User constitutes acceptance of these terms of use.

If the User does not accept the terms of use set out in this contract, the User must refrain from accessing the services offered by the MyCryptoLog application.

The MyCryptoLog team reserves the right to amend the content of these terms of use unilaterally and at any time.

ARTICLE 2: Legal notice

The MyCryptoLog application is published by Mr Bruno PIERRE-JUSTIN, based in Le Haillan (33185), France.

The MyCryptoLog application is hosted by OVH, a simplified joint-stock company (SASU) with a share capital of 10,174,560.00 euros, whose registered office is at 2 rue Kellermann, 59100 Roubaix, France. The servers are located in Beauharnois (Quebec, Canada); Canada is recognised by the European Commission as providing an adequate level of protection for personal data.

ARTICLE 3: Definitions

This clause defines the essential terms of the contract:

User: any person who uses the application or any of the services it offers.

User content: the data provided by the User within the application.

Member: the User becomes a member once signed in to the application.

Username and password: all the information required to identify a User on the application. The username and password give the User access to services reserved for members of the application. The password is confidential.

Premium options: optional features of the application, described in Articles 4 and 5.

ARTICLE 4: Access to the services

The MyCryptoLog application is available free of charge, anywhere, to any User with Internet access. All costs incurred by the User to access the service (computer equipment, software, Internet connection, etc.) are borne by the User.

The application is funded by advertising. Optional Premium options are offered: no advertising, custom price alerts, wallet alerts, breakdown of assets by exchange, investment statistics, a weekly PDF report sent by email, capital gains calculation aid with CSV export (for information only, not tax advice) and access from a web browser. They are offered for one month on sign-up, only once per email address (“Premium Offer”, with reduced advertising), then available by monthly or yearly subscription, taken out in the Android application with Google Play, at the prices shown in the application. The subscription renews automatically until the User cancels it in Google Play; cancellation takes effect at the end of the paid period. Payment, invoicing and refunds are handled by Google Play, under its terms. Deleting the MyCryptoLog account does not cancel the subscription: the User cancels it in Google Play. The application remains free and usable without these options. In the Android application, this free use requires the User to accept advertising: their choice is collected on first launch, where the regulations require it, and can be changed at any time from the Settings (“Privacy options”). A User who refuses can use the application with a Premium account.

Any event due to force majeure resulting in a malfunction of the network or the server does not engage the liability of the MyCryptoLog team.

Access to the services of the application may be interrupted, suspended or modified at any time without notice, for maintenance or for any other reason. The User agrees not to claim any compensation following the interruption, suspension or modification of this contract.

The User undertakes to check the data they record in the application, even though the application offers automated calculations and/or calculations triggered by the User.

The User may contact the team by email at mcl-support@mycryptolog.com.

ARTICLE 5: Right of withdrawal

In accordance with Articles L221-18 et seq. of the French Consumer Code (Directive 2011/83/EU), a User acting as a consumer has fourteen (14) days from taking out their first Premium subscription to withdraw, without having to give any reason.

To exercise this right, the User sends an unambiguous request to mcl-support@mycryptolog.com, stating the email address of their account and the Google Play order number (GPA.…). The User may also request a refund directly from Google Play, under Google's terms.

The publisher refunds the full price paid within fourteen (14) days of receiving the request, using the means of payment used for the purchase, through Google Play. The refund ends the subscription and the corresponding Premium options.

The automatic renewal of a subscription is not a new subscription and does not open a new withdrawal period.

ARTICLE 6: Intellectual property

The trademarks, logos, signs and all other content of the application are protected by the French Intellectual Property Code, and in particular by copyright. Mr Bruno PIERRE-JUSTIN owns the intellectual property rights or holds the rights of use for all the elements available in the application.

The User must obtain the prior authorisation of the MyCryptoLog team for any reproduction, publication or copy of the various contents.

Any data published by the User is their sole responsibility. The User undertakes not to publish content that may harm the interests of third parties. Any legal action brought by an injured third party against the MyCryptoLog team will be borne by the User.

The User's content may be deleted or modified by the application at any time and for any reason. The User receives no justification or notification prior to the deletion or modification of the content.

ARTICLE 7: Personal data

The information requested on sign-up is necessary and mandatory (email address and password). The email address is used to manage the account (confirmation, password reset, security alerts), for the messages chosen by the User (alerts, weekly report) and to contact the User if needed.

The MyCryptoLog application collects and processes the User's personal data in compliance with Regulation (EU) 2016/679 of 27 April 2016 on data protection (GDPR) and the amended French Data Protection Act No. 78-17 of 6 January 1978.

In accordance with Articles 15 to 21 of the GDPR, the User has the right to access, rectify, erase, restrict, port and object to the processing of their personal data. The User exercises these rights:
- by deleting their account in the application settings;
- by email to mcl-support@mycryptolog.com.

The User may also lodge a complaint with the French data protection authority (CNIL, www.cnil.fr).

Account data is kept for as long as the account exists. Deleting the account erases the wallet, transactions, options, notifications, sessions and the account itself. Technical logs (email address, IP address, device information) are kept for no more than 12 months for security and troubleshooting purposes; those linked to the account are erased when it is deleted.

To operate, the application relies on the following providers, which may process some of the User's data:
- OVH (France): hosting of the application and its data, sending of emails;
- Google Firebase Cloud Messaging: push notifications (notification identifier of the device or browser);
- Google AdMob: advertising in the Android application (advertising identifier of the device);
- Google reCAPTCHA: protection of the sign-up form against bots;
- Google Charts and Font Awesome: display of charts and icons, loaded from their servers (which receive the IP address);
- Google Play: distribution of the Android application and payment of Premium subscriptions.

Some of these providers may process data outside the European Union, under the safeguards provided for by the GDPR. Prices and market data come from CoinGecko, exchange rates from currencyapi and the automatic translations of the help pages from Google Translate: no personal data is sent to them.

ARTICLE 8: Liability and force majeure

The sources of the information published in the application are deemed reliable (www.coingecko.com). However, the application does not guarantee the reliability of these sources. The information given in the application is provided for information purposes only. The User therefore assumes sole and full responsibility for the use of the information and content of this application.

The application cannot provide an absolute guarantee of the security and confidentiality of the data transmitted. However, the application undertakes

to implement all the necessary means to ensure the best possible security and confidentiality of the data.

The MyCryptoLog team cannot be held liable in the event of force majeure or of an unforeseeable and insurmountable act of a third party.

ARTICLE 9: Hyperlinks

The application may contain outgoing hyperlinks; however, the MyCryptoLog team has no control over these external links and accepts no liability for the web pages they lead to.

The User therefore refrains from holding the application liable for the content and resources of these outgoing hyperlinks.

ARTICLE 10: Changes to the contract

The MyCryptoLog team reserves the right to amend the clauses of this contract at any time.

ARTICLE 11: Duration

This contract is concluded for an indefinite period. It takes effect for the User from the moment they start using the MyCryptoLog application.

ARTICLE 12: Governing law and jurisdiction

These terms of use are governed by French law. In the event of a dispute, and failing an amicable settlement, the competent French courts shall have jurisdiction, subject to the mandatory rules protecting consumers.
